# BEYOND

BEYOND is the 110 meters wall at Amsterdam Schiphol Airport which creates a 3D dimension of clouds. As you walk by the 3D lenses show different perspectives of Dutch skies.

Inspired by 17th-century Masters painters, BEYOND has the impression of providing new dimensions of depth and light at the Departure Hall 3. Together with a team of experts, Roosegaarde worked on a unique printing technology to provide its 3D effect.

BEYOND is a permanent artwork and is open to all.
