

DUNE 4.1

DESCRIPTION

DUNE 4.1 MAASTUNNEL is a public, interactive landscape placed in the Maastunnel for the Rotterdam 2007 City of Architecture.

With its upgraded embedded technologies, this enlarged interactive artwork reacts to the sounds and motions of the people daily passing by. DUNE 4.1 is a sensual layer of interaction over the existing architecture of the Maastunnel in Rotterdam, NL.

Date: 2007

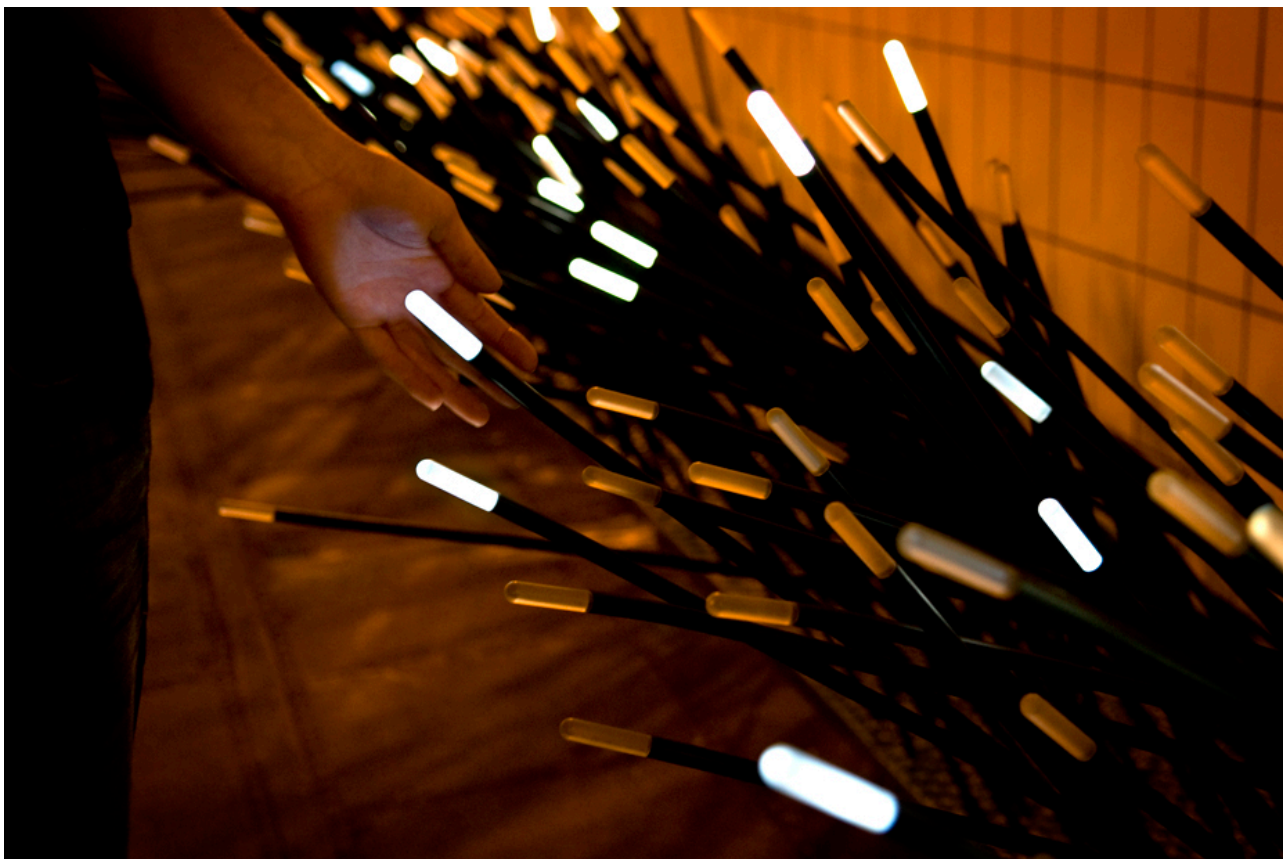

Client: Rotterdam 2007 City of Architecture

Materials: Hundreds of fibers, steel, microphones, sensors, speakers, software and other media.

Artist: Daan Roosegaarde

Size: Corridor of 40 meters.

More info: studio Roosegaarde.net
