

# FLOW 5.0

## DESCRIPTION

**FLOW 5.0** is a smart wall composed of hundreds of ventilators that interact with passing visitors. By walking and interacting with its surface, the visitor triggers the emergence of an illusive landscape created out of transparent fields and artificial winds.

Measuring several meters, the most recent version of **FLOW** heightens the visitor's consciousness of him or herself as a collective body, becoming one with space and technology.

**Date:** 2007 - 2011

**Client:** TodaysArt (2007)

**Materials:** Hundreds of ventilators, aluminum, sensors, microphones, electronics, software and other media.

**Artist:** Daan Roosegaarde

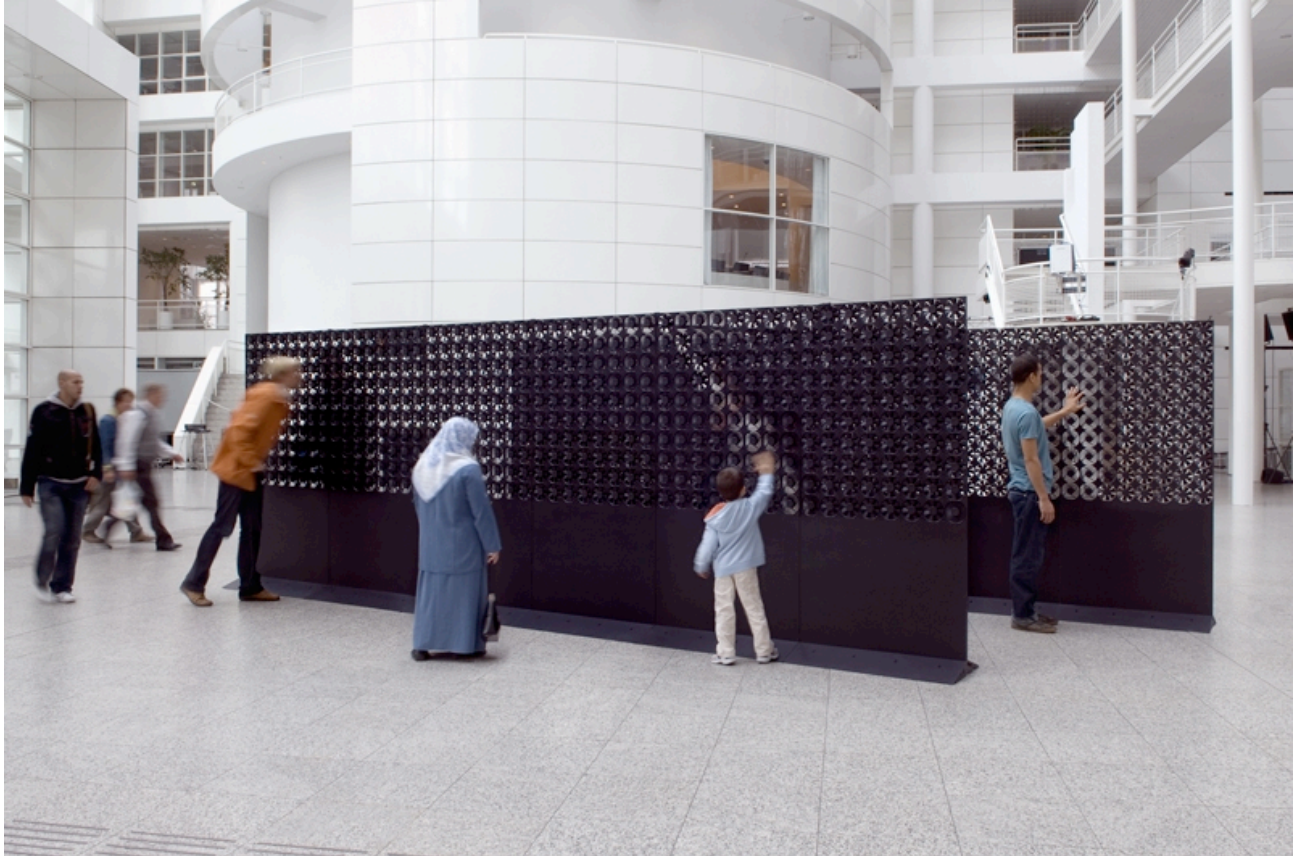

**Size:** Modular system of 2 x5 meters, length 50 cm, width 5000 cm, height 200 cm.

**More info:** [studio Roosegaarde.net](http://studio Roosegaarde.net)

Detail

City Hall, The Hague NL.
