

LUNAR 8.0

DESCRIPTION

The interactive artwork, LUNAR features a series of interactive light objects placed at the Youth division of Mental Health Care GGz in the Netherlands. Filled with LEDs and interactive technologies, the objects are designed to 'come to life' by emitting sounds and color upon detection of children's touch.

By intervening with the existing architecture, LUNAR creates an informal play between children, their therapy and the building.

Date: 2010-2011

Client: Commission for Mental Health Care GGz Breda, developed with SKOR| Foundation for Art and Public Domain.

Materials: Molded white pillars, LEDs, electronics, sensors, software and basement.

Artist: Daan Roosegaarde

Size: Diameter 30cm, heights from 100 to 160cm.

More info: studioroosegaarde.net
