

SMOG FREE PROJECT

Dutch designer Daan Roosegaarde and his team of experts have created the world's largest smog vacuum cleaner. The Smog Free Tower uses patented ion technology to produce smog-free bubbles of public space, allowing people to breathe and experience clean air for free.

Creating a tangible souvenir, Roosegaarde designed Smog Free Rings and Smog Free Cufflinks of compressed smog particles. By sharing a Smog Free Jewellery, you donate 1000m³ of clean air to the city.

The Smog Free Project is not only intended to be a final solution, but also a sensual experience of a clean future. Along with governments, NGOs and the clean-tech industry, people become part of the solution instead of the problem. Join the Smog Free Movement now and support our [Kickstarter](#).

2014-2018. The first 7-meter high Smog Free Tower equipped with energy-friendly and patented ion technology is now open for public at Vierhavensstraat 52 in Rotterdam NL, and will travel around the world. The first Smog Free Tower cleans 30.000m³ per hour and runs on 1400 watts of green energy. Smog Free Rings and Smog Free Cufflinks are now available on [Kickstarter](#).
