

SMOG FREE PROJECT

Dutch designer Daan Roosegaarde and his team of experts have created the world's largest smog vacuum cleaner. The Smog Free Tower equipped with environment friendly and patented positive ionization technology cleans 30.000 m³ per hour and uses no more electricity than a waterboiler (1170 watts).

Creating a tangible souvenir, Roosegaarde designed Smog Free Rings, Smog Free Cubes and Smog Free Cufflinks of compressed smog particles. By sharing Smog Free Jewellery, you donate 1000 m³ of clean air to the city.

The Smog Free Project is not only intended to be a local solution for parks, but also an inspirational experience of a clean future. Along with governments, NGOs, pro-bicycle campaigns and the clean-tech industry, people can work together to make a whole city smog free.

2014-present. Smog Free Jewellery is available through mail@studioroosegaarde.net. More information is available at <https://www.studioroosegaarde.net/project/smog-free-project/info/>.
